DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on March 19, 2007 has been entered.

Claim Objections

2. Claim 5 is objected to because of the following informality: "said biscuits" in line 3 of claim 5 should be replaced by --said at least one biscuit shaped partition--, in order to maintain consistent terminology throughout the claims. Appropriate correction is required.

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 2-5 are rejected under 35 U.S.C. 103(a) as being unpatentable over Wright (U.S. 5,094,375) in view of Johnson (U.S. 3,134,499). Wright discloses the claimed invention except for the tray being comprised of two parts, a first which fits within a second. Johnson teaches that it is known to provide a tray with two parts, a first which fits within a second (see figures 1-5). It would have been obvious to one having ordinary skill in the art at the time the invention was made to provide the container

of Wright being made of two parts, a first which fits within a second, as taught by Johnson, in order to make the container adjustable in size for transportation and storage purposes. It has also been held that adjustability, where needed, is not a patentable advance. *In re Stevens*, 212 F.2d 197, 101 USPQ 284 (CCPA 1954)

Response to Arguments

5. Applicant's arguments with respect to the claims have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The prior art is cited for the congruent and adjustable container parts.

7. THIS ACTION IS NON-FINAL.
